

## Installing ArcGIS Desktop – Concurrent Use License

With ArcGIS Desktop Concurrent Use License, core products and extensions on client machines obtain and share licenses from a pool of available licenses that reside on a networked license manager.

## Install the License Manager

To install the license manager, follow these steps:

- 1. Run the License Manager setup from the installation program.
- 2. Follow the instructions to install the license manager to the desired location; the default installation location is C:\Program Files\ArcGIS\License10.5.
- 3. Once you have completed the license manager installation, use the ArcGIS License Server Administrator to authorize licenses for the license manager.
- 4. Click Authorization in the table of contents and click the Authorize Now button to launch the Software Authorization Wizard.

GEODATA SYSTEMS TECHNOLOGIES, INC. 19/F Strata 100 Building, F. Ortigas Jr. Road, Ortigas Center Brgy. San Antonio, 1605 Pasig City, Metro Manila

Tel. No. +632 637-4449 Fax No. +632 633-6873 Email: <u>marketing@geodata.com.ph</u> The authorization process will now begin. A stable Internet connection is strongly recommended for the license authorization process.

11. Click Finish after the licenses have successfully been authorized.

## Install ArcGIS Desktop

Before installing ArcGIS Desktop, verify that your computer meets the system requirements.

- 1. Launch the ArcGIS Desktop setup by clicking setup.exe from the installation program.
- 2. During the installation, read the license agreement and accept it, or exit if you do not agree with the terms.
- 3. The setup program provides an option for a Complete installation, which installs the applications, style files, templates, and optionally licensed extensions. The Custom installation option allows you to choose specific installation components.
- 4. The installation location will be identified in this dialog box or in the custom dialog box, if a custom option was selected.

estinati	on Folder

67	Install ArcGIS Desktop 10	0.5.1 to:		
0	C:\Program Files (x86)\A	rcGIS\Desktop10.5\	l.	
	1	x Davla	Mautos	The second

- 5. If Python is selected for installation, you must choose the installation location or select the default.
- 6. When the setup is complete, the ArcGIS Administrator Wizard is displayed, allowing you to configure a Concurrent Use authorization.

## Specify the License Manager

1. In the ArcGIS Administrator, navigate to Desktop in the directory tree. Click on the radio button for the desired software product (as made available by the license).

The ArcGIS Administrator Wizard is only launched the first time you install ArcGIS Desktop. After you have completed the ArcGIS Administrator Wizard, you can access the ArcGIS Administrator by navigating to Start > Programs > ArcGIS > ArcGIS Administrator.

2. To specify a License Manager (for Concurrent Use software products), click Change.

- L X
Select the software product to be used for ArcGIS Desktop applications: <ul> <li>Advanced (ArcInfo) Concurrent Use</li> <li>Standard (ArcEditor) Concurrent Use</li> </ul>
Basic (ArcView) Concurrent Use
Advanced (ArcInfo) Single Use
Standard (ArcEditor) Single Use
O Basic (ArcView) Single Use
Change Launch the Authorization Wizard to authorize Single Use features: Authorize Now

3. Specify the name or IP Address of the machine which serves as the license manager. Optionally, click on Browse to locate the license manager host on the network.

License Manager Browse for a License Manager on the network or enter one or more License Managers separated by ";". To specify a port use the <port>@<host> syntax. Browse</host></port>	Change License Manager		$\times$
